* With the 4-1-22 adjustment, these rates were “held harmless” and were kept at the rates from the previous Market Rate Survey, as these past rates were higher.

**DCF pays a statewide rate for in-home care provided in the child’s home by a relative. This rate is \$2.42/hour effective 11-1-18.

Child care provider rates are based on data received by conducting a market analysis and a narrow cost analysis. A child care market analysis measures the child care prices charged by the providers and paid by parents in a specified geographic area. A narrow cost analysis measures what it actually costs child care providers to provide the care. The above rates were effective 12-1-2023. Based on information received in the 2020 market analysis, benefits for families using licensed home providers or child care centers are paid at approximately the 85th percentile or better. This means that 85% of providers charge the private sector the state rate or below. Out-of-home relative providers are paid a rate that is 65% of the rate for licensed child care homes.

Providers serving children who have been professionally evaluated as having a special need severe enough to require additional staff or specialized support services not routinely available, may be eligible for reimbursement up to, but not exceeding, the Enhanced Rate for Special Care of \$7.25 per hour for all ages of children, for all approvable hours of care, effective 4-1-22. An ES 1627A Request for Enhanced Rate for Special Care form is completed requesting the enhanced payment rate for a child. All requests for the Enhanced Rate for Special Care must be approved by regional child care provider enrollment staff.
