

# Soft EDBC

The Review batch runs for all households with a Review due the following month. Mixed households (those with Passive and Pre-Populated Review types) have a Soft EDBC run on the program. Staff are not able to manually generate a Soft EDBC result, it can only be generated by batch.

The **EDBC Run Reason** is *RE Soft EDBC*. The **Type** is *Read Only* (remember that a Read Only EDBC does not send benefits to KMMS) and the **Type Reason** is *RE Soft EDBC*.

A screenshot of a software interface titled "EDBC Information". The form contains several fields with red rectangular highlights around them. The first highlighted field is "EDBC Run Reason:" with the value "RE Soft EDBC". Below this, there are two side-by-side highlighted fields: "Type:" with the value "Read Only" on the left, and "Type Reason:" with the value "RE Soft EDBC" on the right. At the bottom of the form, there is a field labeled "Multi-Month EDBC :" with the value "No".

EDBC Information	
EDBC Run Reason: RE Soft EDBC	
Type: Read Only	Type Reason: RE Soft EDBC
Multi-Month EDBC : No	

The intent of a Soft EDBC is to see if anyone is going to lose coverage and to then be used as a tool to assist staff when consumers call in with questions about their coverage at Review time. Consumers may not understand why some members need to return the Pre-Populated Review form and others do not. Workers can view the Soft EDBC Result to easily see which members are set to be discontinued and for what reason.

To view a Soft EDBC Result, follow the steps in **EDBC Results (ks.gov)**.
